

## **IMMUNOMEDICS TO PRESENT AT COWEN AND COMPANY 34TH ANNUAL HEALTH CARE CONFERENCE**

**Morris Plains, NJ, February 26, 2014 --- Immunomedics, Inc. (Nasdaq: IMMU),** a biopharmaceutical company primarily focused on the development of monoclonal antibody-based products for the targeted treatment of cancer, autoimmune and other serious diseases, today announced that the Company will present at Cowen and Company 34<sup>th</sup> Annual Health Care Conference on Wednesday, March 5, 2014 at 11:20 a.m. Eastern Time in Boston, Massachusetts. The presentation, which will provide a corporate overview, can be accessed at [www.immunomedics.com/pdfs/company-presentation.pdf](http://www.immunomedics.com/pdfs/company-presentation.pdf).

### **About Immunomedics**

Immunomedics is a New Jersey-based biopharmaceutical company primarily focused on the development of monoclonal antibody-based products for the targeted treatment of cancer, autoimmune and other serious diseases. We have developed a number of advanced proprietary technologies that allow us to create humanized antibodies that can be used either alone in unlabeled or “naked” form, or conjugated with radioactive isotopes, chemotherapeutics, cytokines or toxins, in each case to create highly targeted agents. Using these technologies, we have built a pipeline of therapeutic product candidates that utilize several different mechanisms of action. Our lead product candidate, epratuzumab, is currently in two Phase III clinical trials in lupus. In oncology, clivatuzumab tetraxetan labeled with a radioisotope is in a Phase III pivotal trial in advanced pancreatic cancer patients. Other solid tumor therapeutics in Phase II clinical development include 2 antibody-drug conjugates, IMMU-132 (anti-TROP-2-SN-38) and IMMU-130 (anti-CEACAM5-SN-38). We also have a majority ownership in IBC Pharmaceuticals, Inc., which is developing a novel DOCK-AND-LOCK<sup>™</sup> (DNL<sup>™</sup>) method with us for making fusion proteins and multifunctional antibodies. DNL<sup>™</sup> is being used particularly to make bispecific antibodies targeting cancers and infectious diseases as a T-cell redirecting immunotherapy, as well as bispecific antibodies for next-generation cancer and autoimmune disease therapies. We believe that our portfolio of intellectual property, which includes approximately 245 active patents in the United States and more than 400 foreign patents, protects our product candidates and technologies. Our strength in intellectual property has resulted in the top-4 ranking in the January 2014 Patent Board scorecard in the Biotechnology industry.
